

CISA'S VULNERABILITY SCANNING

SECURE YOUR BUSINESS'S FUTURE WITH CISA'S VULNERABILITY SCANNING

In an era where cyber threats are not just possibilities but harsh realities, proactive and comprehensive cybersecurity is a business imperative. CISA's Vulnerability Scanning service monitors your internet connected assets for known vulnerabilities and informs your risk management efforts, so you can protect your business from cyber threats and disruptions.

BY TAKING ADVANTAGE OF CISA'S SCANNING SERVICE YOU WILL:

SIGNIFICANTLY REDUCE RISK. Choose our service because it's effective and proven. Organizations like yours typically reduce their risk and exposure by 40% within the first 12 months. Most see improvements in the first 90 days.

AVOID SURPRISES. Because the service looks for exposed assets, whether planned or inadvertent, it identifies vulnerabilities that would otherwise go unmanaged.

SHARPEN YOUR RESPONSE. Combining the vulnerability insights gained with existing threat detection and risk management efforts increases the accuracy and effectiveness of response activities. This means you'll have fewer false alarms and less chance of real dangers slipping through the net, keeping your network secure and operations running smoothly.

BROADEN YOUR SECURITY HORIZON. Trust in CISA's scanning because it's not just about pinpointing vulnerabilities; it's about expanding your business's security boundaries. From basic asset awareness to daily alerts on urgent findings like known exploited vulnerabilities, we've got you covered.

HOW IT WORKS

Once enrolled you're in control. Your internet connected assets will be scanned by CISA's highly skilled and experienced team of professionals on an on-going basis to identify running services and vulnerabilities. You can start, stop, or pause the service at any time, and you'll begin receiving easy-to-understand, actionable reports weekly as well as daily alerts for any new findings that require urgent attention.

THE BOTTOM LINE

In today's business world, cybersecurity is not a luxury; it's a necessity. By partnering with CISA you're not just securing your digital assets; you're making a no-cost, low-risk strategic choice to proactively protect your business's reputation and future in the digital age.
